

DOCTOR-PATIENT RELATIONSHIP IN CHIROPRACTIC

CHIROPRACTIC

It is important to acknowledge the difference between the health care specialties of Chiropractic, Osteopathy, and Medicine. Chiropractic health care seeks to restore health through natural means and without the use of medicine or surgery. This gives the body maximum opportunity to utilize its inherent recuperative powers. The success of the Chiropractic Physician's procedures often depends on environment, underlying causes, physical and spinal conditions. It is important to understand what to expect from Chiropractic health care services.

ANALYSIS

A Chiropractic physician conducts a clinical analysis for the express purpose of determining whether there is evidence of Vertebral Subluxation (VSS) or Vertebral Subluxation Complexes (VSC). When such VSS or VSC complexes are found, Chiropractic adjustments and ancillary procedures may be given in an attempt to restore spinal integrity. It is the Chiropractic premise that spinal alignment allows nerve transmission throughout the body and gives the body an opportunity to use its inherent recuperative powers of the body.

DIAGNOSIS

Although Chiropractic Physicians are experts in Chiropractic diagnosis, the VSS and VSC, they are not internal medical specialists. Every Chiropractic patient should be mindful of his/her own symptoms and should secure other opinions if he has any concern as to the nature of his total condition your Chiropractic Physician may express an opinion as to whether or not you should take this step, but you are responsible for the final decision.

INFORMED CONSENT FOR CHIROPRACTIC CARE

A patient, in coming to the Chiropractic Physician, gives the doctor permission and authority to care for the patient in accordance with Chiropractic tests, diagnosis, and analysis. The Chiropractic adjustment or other clinical procedures are usually beneficial and seldom cause a problem. In rare, cases, underlying physical defects, deformities, or pathologies may render the patient susceptible to injury. The doctor of course will not give a chiropractic adjustment, or health care, if he is aware that such care may be contraindicated. Again, it is the responsibility of the patient to make it known or to learn through health care procedures whatever he/she is suffering from: Latent pathological defects, illness or deformities which would otherwise not come to the attention of the Chiropractic Physician. The patient should look to the correct specialist for the proper diagnostic and clinical procedures. The Chiropractic Physician provides a specialized, non-duplicated health care service. The Doctor of Chiropractic is licensed in a special practice and is available to work with other types of providers in your health care regime.

RESULTS

The purpose of Chiropractic Services is to promote natural health through the reduction of the VSS and VSC since there are so many variables it is difficult to predict the time schedule of efficacy of the Chiropractic procedures. Sometimes the response is phenomenal.

In most cases there is a more gradual, but quite satisfactory response. Occasionally, the results are less than expected. Two or more similar conditions may respond differently to the same Chiropractic care. Many medical failures find quick relief through Chiropractic. In turn, we must admit that conditions, which do not respond chiropractically, may come under the control or be helped through medical science. The fact is that the science of Chiropractic and medicine may never be so exact as to provide definite answers to all problems. Both have great strides in alleviation of pain and controlling disease.

The patient should discuss any questions or problems with the doctor before signing this statement of policy.

I have read and understand it.
