THE TRIUNE OF LIFE

I want to talk this month about the triune of life. Tri means three, so three parts of life as it relates to health.

Without getting too involved, I want to mention that in chiropractic we talk about a universal intelligence which runs our universe. To keep things simple, let's just say that if universal intelligence runs our universe, then there is an innate intelligence that is in each of our bodies which runs our individual bodies. If I could keep it even more simple, think of universal intelligence as the sun and innate intelligence as the rays of the sun. (Don't worry about skin cancer just yet!)

EVERYTHING MATTERS

Now everything in the universe is made up of matter, just the physical "stuff" all around us. Now our bodies are matter but we are living matter. Living matter as opposed to that sidewalk out in front of your house. But our living matter is not "alive" unless it is "sparked" to life from this innate intelligence. Innate intelligence keeps our bodies alive by sending a signal or an electrical "impulse" from our brain to every body part over the nerve system.

So we have three (triune) huge pieces of a puzzle.

1. Innate intelligence
2. Life force (electrical spark)
3. Innate matter (our bodies)

When there is a disconnect in this simple process, innate intelligence - life force - innate matter, we have big trouble.

IS THIS WHERE CHIROPRACTIC COMES IN?

Yes, this is where chiropractic comes in. Chiropractic unites man the spiritual (innate intelligence) with man the physical (living matter) by making sure the life force flows between the two. When you have a vertebral subluxation (bone out of place interfering with the nerve) you have a disconnect between the two.

THAT IS SO EASY!!

Use this newsletter as a coupon and for \$40.00 you can get a consultation, examination, X-rays (if needed) and report of findings.
