

## IS SURFORCE® SAFE?

Amniotic membrane has been successfully used in treatments for decades. It is renowned for its unique ability to bolster the body's self-healing properties through regenerative medicine. SurForce® is accepted by the body and does not trigger an immune response because of its low antigen level and dramatically efficient characteristics.

There have been more than 100,000 amniotic membrane implants over the years and there have been no adverse reactions reported.

## HOW IS SURFORCE® TESTED?

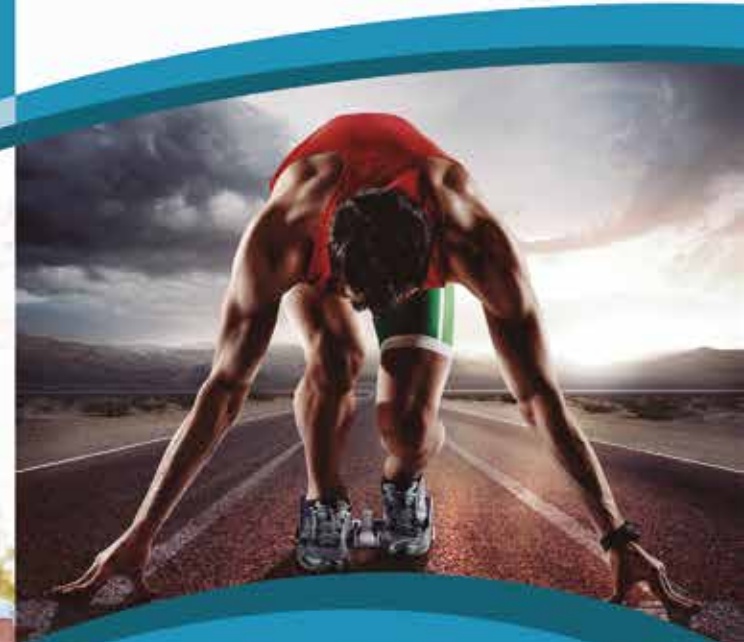

SurForce® is regulated by the FDA as a tissue under Section 361 of the Public Health Service Act. The amniotic membrane in SurForce® is obtained through voluntary donation after a C-section delivery. Every SurForce® donor provides detailed medical history and receives an extensive medical background screening, including testing for a wider range of diseases and conditions than any other company in the industry.

## WHAT ARE THE MAIN SURFORCE® TREATMENTS

- Soft Tissue Damage
- Osteoarthritis
- Burns
- Plantar Fasciitis
- Sexual Wellness
- Wounds
- Rheumatoid Arthritis
- Tendinitis
- Hair Regeneration

Same Patient 4 Months Later

\*Notice the visible spacing 4 months after the original X-ray

## CRYOPRESERVED AMNIOTIC MEMBRANE ALLOGRAFT

**SURGENEX®**  
Pioneering the Future Today

## WHAT IS SURFORCE®?

SurForce® contains a rich source of amniotic membrane that naturally reduces pain and inflammation while helping the healing process of damaged joints, cartilage, tendons, ligaments, and other soft tissues. It is the most concentrated injectable amniotic membrane on the market today.

The reason SurForce® generates unprecedented results is explained by the therapeutic qualities of the membrane where it originates. The rejuvenating properties of the amniotic membrane are a rich and fertile source of natural proteins and growth factors.

SurForce® also contains a vital natural mechanism called a scaffold that helps this unique product revive damaged areas. The added benefits of hyaluronic acid help lubricate cartilage and promote new cartilage growth.

## WHAT ARE THE BENEFITS OF SURFORCE®?

- ✓ Relieves pain
- ✓ Reduces inflammation
- ✓ Non-steroidal
- ✓ Promotes soft tissue growth
- ✓ No adverse reactions reported
- ✓ Natural hyaluronic acid (joint lubricant)

## WHAT IS THE SURFORCE® TREATMENT PLAN?

Every patient receives a personal plan to treat their specific condition and achieve long-term success. The dynamic properties of SurForce® require patients to comply with their customized treatment plan to ensure the best outcome. With any medical procedure there is always the possibility that an unexpected factor will affect the healing process, such as the age or physical condition of the patient. It is very important to remember that the treated area is going through a long-term natural regenerative process and can easily be damaged with too much stress. Very light activity is recommended for the first 2-6 weeks after treatment followed by light rehab for up to 6 months. Please keep in mind that additional injections may be required depending on the severity and type of injury.

## WHAT DO SURFORCE® PATIENT'S SAY?

**William Loftus** - Played 11 seasons in the Canadian Football League - two-time Grey Cup Champion.

*My football career left me with a horrible quality of life that I never thought would change. Then I was introduced to Surgenex... Now my shoulder and knees feel 100% better!!*

### **Mercie B.**

*After 32 years of arthritis pain, pain is all I knew. It was just kind of natural to go through the day with aches and sharp spikes of discomfort. After just one injection, the chronic pain in my left shoulder was completely gone!*

### **Belinda L.**

*My pain level from a 1 to 10 was always a 10! It didn't matter what pills I took or what I did to try to find relief with homeopathy or acupuncture. The pain was unbearable, but not now... every morning I wake up and literally say, "thank you, SURGENEX!"*
