

Genetic Testing For Wellbeing

Has been proven to decrease health care costs and improve the wellbeing of the employee.

For example, a large insurance company did a year-long genetic testing program specific to disease prevention and weight management for employees, the findings include:

Three quarters of the more than 400 people in the program reported significant weight loss, with an average weight loss of 10 pounds.

People in the program improved in several of the risk factors associated with metabolic syndrome, including waist size, triglycerides and “good” cholesterol (HDL) levels.

Follow Your Genetic Roadmap To Health and Longevity

Test Your Entire Family

Can you imagine a time when testing could provide you and your family a **genetic roadmap** and action steps that aid and support you in a direction of **prevention** for what might be genetically lying ahead of you.

The Time is Now!

Unleash Your Potential!

Your Data Your Property

All genetic test results and any Personal Information are maintained under a strict policy of confidentiality. Your test results will never be sold to a third party.

Talk to your Health Care Practitioner today to purchase a test.

Its as simple as 1-2-3

1. Cheek swab test
2. Mail in prepaid envelope
3. Get your results in 28 days

This test was developed and its performance characteristics determined by Gene by Gene, a wholly owned subsidiary of myDNA, Inc. It has not been cleared or approved by the FDA. FDA does not require this test to go through premarket FDA review. This test is used for clinical purposes.

What the Test Reveals

- Methylation
- Nutrient Metabolism & Digestion
- Hormone Support
- Mental Health
- Cognitive Performance
- Detoxification
- Toxin Sensitivity
- Heavy Metal Sensitivity
- Immune Support
- Antioxidant Protection
- DNA Protection & Repair
- Cardiovascular Health
- Athletic Performance
- Personalized DNA-Based Grocery List
- Personalized Blood Work Recommendations
