

Concerning Holistic Healthcare

My injury situation started when I had a motorcycle accident injuries.* That came with bad open wounds plus bone fractures and joint real damage along with a serious head-first* slide into a side-walk curb. After first being in the hospital I was then released to a team of three doctors for months of treatment with little improvement.

Although my situation was unsatisfactory, my attorney told me not to worry. He said he knew a great holistic doc (Dr. Dauer) who specializes in getting "hopeless" cases better. My attorney told me when his artificial hips stopped working, after just a little bit of treatment with Dr. Dauer he was once again able to play sports . Additionally, Dr. Dauer later related he "privately treated some NFL LA Raiders football players including Jerry Robinson, an all-pro linebacker, whose injured knee forced him to be placed on the DL for 9 weeks, but with the treatment he was ready to play in only 1 week."

However, in my case Dr. Dauer explained that I had sustained simultaneously 2 concussions from the slide into the curb.* The first was the brain itself, the other one he described as a traumatic spinal cord compression-concussion. Dr. Dauer stated he had many concussion cases but never one this bad. I told him I wanted to get everything fixed and that I was most worried about the brain stuff* especially thinking, memory losses, etc. Currently, even yet, I'm still improving. All I can say is, I would have been ruined and depressed* without his incredible treatments. I can still hardly believe how much better he got me from where I was.

So... If anyone ever gets injured like me, I can assure everyone, no one would ever regret going to Dr. Dauer for the best holistic injury care out there.

*PS:(As related by patient, but not stated in his above letter);
