

For your Health and Wellness!

Hall of Shame part 2

Here is more information to act as a follow-up to last week's handout!
Honestly, have you have enough drugs yet?

Yaz and Yasmin

Soon after Bayer launched the pill Yaz, 18 year olds started coming down with blood clots, gall bladder disease, heart attacks and even strokes.

Chantix

After cases of possible psychosis, reports of suicidal behaviors and actual suicides, the government banned pilots, air-traffic controllers and interstate truck and bus drivers from taking this antismoking drug.

Ambien

Law enforcement officials say this sleep drug has increased traffic accidents from people who drive in a black out.

Tamoxifen

For every case of breast cancer prevented by Tamoxifen, there is a life-threatening case of blood clots, stroke or endometrial cancer caused by it.

Lipitor and Crestor

All statins can cause muscle breakdown. Crestor is so linked to the side effect, the FDA's David Graham named it one of the five most dangerous drugs at a Congressional hearing.

Gardasil and Cervarix Vaccines

The Gardasil HPV vaccine doesn't work for all viral strains, requires a booster and is linked to 56 girls' deaths as of September in the U.S. alone.

Singulair and Accolate, leukotriene receptor antagonists

These leukotriene receptor antagonists never looked safe. And Singulair, Merck's top selling drug, is now suspected of producing aggression, hostility, irritability, anxiety, hallucinations and night-terrors in kids.

Based on the inadequacies and criminal behavior of pharmaceutical industry, properly prescribed medication leads to the death of more than 100,000 people per year (and that's a lowball estimate)! Anytime you resort to taking a drug you are taking a gamble. The more drugs you combine the greater the risk. Seniors and children watch out! Chiropractic care and Nutrition Response Testing help to promote your health by removing interference to the nervous system and is supplying the basic building blocks your body needs to regain his health. *Want to know more? Just ask.*
