

**There is a great deal of technology and know-how behind what we do**

Having been designed through decades of clinical use on tens of thousands of patients, and on patients from many different types of health care practitioners, you can be assured that Nutrition Response Testing is capable of evaluating and solving your health concerns.

A complete Nutrition Response Testing™ analysis can be done on each patient on each subsequent visit, thereby revealing the next layers of dysfunction so these can also be addressed and corrected.

In this way, each patient gets a completely individualized handling, in the correct sequence for his or her body.

Very much like opening a combination lock, you must use the right numbers in the right sequence and in the right direction at the right time – then the lock falls open.

By following the correct sequence as revealed through Nutrition Response Testing, you don't "shot-gun" your diet or supplements. With a correctly done Nutrition Response Testing analysis, we can determine the correct food supplements for you – designed to give your body the best possible chance of getting well and staying that way.

**Conclusion**

Many people we see in our practice have eaten themselves into their current state of ill-health, to one degree or another. The deficiencies or imbalances lead to a breakdown in resistance, or immunity, and a loss of the ability to cope with environmental stresses (chemical, microscopic, or otherwise).

**The good news is that it is possible to reverse the process!**

**It is possible to restore your health?**

What could be more natural? What could be more correct? Each cell, tissue, and organ in your body is in the process of replacing itself every day, month, and year. The health of each organ is dependent on making the correct nutrients

available to upgrade or to maintain the health of the body at a cellular level.

Designed Clinical Nutrition provides the right basic materials.

Nutrition Response Testing™ tells you when and what to use to bring about the desired result.

With this understanding of what we do, can you see how we might be able to help you do something effective to get yourself well?

And once that is achieved, do you see how you might be able to use this approach to stay well?

Now you have the complete 1-2-3 package. You now know:

- What we do
- How and why we do it
- What you need to do to have the potential of restoring your health and staying healthy.

But in the end you are the one responsible for your own condition. And with our guidance, we feel that – if you are a Nutrition Response Testing case – your chances of greatly improving your health can be as high as 90% or better.

In our experience, if our analysis indicates that you are not a Nutrition Response Testing / nutritional case, then in all probability, while a nutritional program may give you some benefit, it may not give you the maximum results you desire.

**But if our analysis confirms that you are a Nutrition Response Testing / clinical nutritional case, then, in our experience, nothing else will ever come close to what you can possibly achieve using Nutrition Response Testing and Designed Clinical Nutrition.**

We wish you the best of luck in your quest to take back full responsibility for your health. Just remember to do it one step at a time, and that we are here to guide you in that quest.

Once we accept your case, you can count on us to do everything in our power to help you achieve your health objectives, and to help you achieve a healthier, happier life.

May you never be the same.
