Consent to Chiropractic Treatment

The nature of chiropractic treatment: The doctor will use his/her hands or a mechanical device in order to move your joints. You may feel a "click" or "pop", such as the noise when a knuckle is "cracked", and you may feel movement of the joint(s). Various ancillary procedures, such as hot or cold packs, electric muscle stimulation, x-ray, digital imaging, therapeutic ultrasound, dry hydrotherapy, axial traction, extension compression traction, rehabilitation, exercising and stretching, inter-segmental traction, flexion-distraction traction, therapy ball, massage therapy, soft tissue therapy, various topical pain relief creams and/or lotions, may also be used in conjunction with your treatment.

Possible risks: I understand and am informed that, as in the practice of medicine, in the practice of chiropractic, there are some risks to treatment. As with any health care procedure, complications are possible following a chiropractic manipulation. A minority of patients may notice stiffness or soreness after the first few days of treatment. The ancillary procedures could produce skin irritation, burns or minor complications. Complications, while extremely rare, could include but are not limited to: fractures of bone, muscular strain, ligamentous sprain, dislocations of joints, and injury to intervertebral discs, nerves or spinal cord. Cerebrovascular injury or stroke could occur upon severe injury to arteries of the neck.

Probability of risks occurring: The risks of complications due to chiropractic treatment have been described as "rare", about as often as complications are seen from the taking of a single aspirin tablet. The risk of cerebrovascular injury or stroke, has been estimated at one in one million to one in twenty million, and can be even further reduced by screening procedures. The probability of adverse reaction due to ancillary procedures is also considered "rare".

Other treatment options which could be considered may include the following:

- *Over-the-counter analgesics.* The risks of these medications include irritation to stomach, liver and kidneys, and other side effects in a significant number of cases. Medications such as Vioxx have been shown to cause heart damage & death.
- *Medical care*, typically anti-inflammatory drugs, tranquilizers, and analgesics. Risks of these drugs include a multitude of undesirable side effects and patient dependence / addiction in a significant number of cases.
- *Hospitalization* in conjunction with medical care adds risk of exposure to virulent communicable disease in a significant number of cases. Many patient treated n hospital leave with conditions worse than their original complaint.
- *Surgery* in conjunction with medical care adds the risks of infection and adverse reaction to anesthesia, as well as an extended convalescent period in a significant number of cases. Surgery can result in permanent loss of function or death.

Risks of remaining untreated: Delay of treatment allows formation of adhesions, scar tissue and other degenerative changes. These changes can further reduce skeletal mobility, and induce chronic pain cycles. It is quite probable that delay of treatment will complicate the condition and make future rehabilitation more difficult. Patients who do not follow their approved chiropractic treatment plan may revert to their original symptoms, or even become worse from failing to finish treatment.

For WOMEN: X-RAY RIKS

Are you pregnant or any chance you may be: _____ YES _____ NO

X-ray uses radiation which can have a severe health effect during pregnancy to an unborn baby. The possibility of severe health effects depends on the gestational age of the unborn baby at the time of exposure and the amount of radiation it is exposed to. Unborn babies are particularly sensitive to radiation during their early development, between weeks 2 and 15 of pregnancy. If you feel that you may be pregnant, please inform the chiropractor before your exam.

_____ To the best of my knowledge I am not pregnant or believe there is any possibility that I may be pregnant.
_____ I know or believe that I may be pregnant and fully understand the risk and health effects radiation may cause to my unborn baby.

I have read the explanation above of chiropractic treatment. I have had the opportunity to have any questions answered to my satisfaction.

_____ _____

Signature of Patient or Personal Representative Date

Consent for Use and Disclosure of Health Information

SECTION A: PATIENT GIVING CONSENT

Patient Name:_____ **Date of Birth:**_____

Address:_____ **City:**_____ **State:**_____ **Zip:**_____

SECTION B: TO THE PATIENT – PLEASE READ THE FOLLOWING STATEMENTS CAREFULLY

Purpose of Consent: By signing this form, you will consent to our use and disclosure of your protected health information to carry out treatment, payment activities, and healthcare operations.

Notice of Privacy Practices: You have the right to read our Notice of Privacy Practices before you decide whether to sign this Consent. Our Notice provides a description of our treatment, payment activities, and healthcare operations, of the uses and disclosures we may make of your protected health information, and of other important matters about your protected health information. A copy of our Notice accompanies this Consent. We encourage you to read it carefully and completely before signing this Consent.

We reserve the right to change our privacy practices as described in our Notice of Privacy Practices. If we change our privacy practices, we will issue a revised Notice of Privacy Practices, which will contain the changes. Those changes may apply to any of your protected health information that we maintain.

YOU MAY OBTAIN A COPY OF OUR NOTICE OF PRIVACY PRACTICES, INCLUDING ANY REVISIONS TO OUR NOTICE, AT ANY TIME BY CONTACTING:

Maestro Chiropractic & Rehab
2949 Swede Rd., East Norriton, PA 19401
