

NEUROPATHY

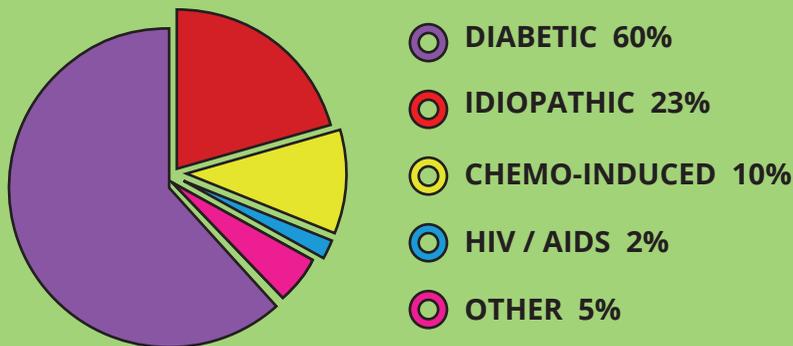

PATIENT INFORMATION BOOKLET

LET US HELP YOU GET THE BEST TREATMENT FOR YOUR NEUROPATHY

According to the Foundation for Peripheral Neuropathy

Over 20 million Americans suffer from neuropathy and of that 20 million the following chart shows the different types of patients diagnosed with neuropathy.

WE HAVE 30 YEARS OF EXPERIENCE TREATING NEUROPATHY WITH AND **THOUSANDS** OF SUCCESS STORIES FROM BOTH PATIENTS AND DOCTORS ALIKE.

ABOUT

NEUROPATHY

WHAT IS NEUROPATHY?

Neuropathy is a problem with your nerves.
(“neuro” meaning nerves, “opathy” meaning problem.)

Neuropathy is a common complication of a number of different medical conditions. However, it is most often seen in those who have diabetes.

Sometimes it affects a single nerve or nerve set, for example, in Bell’s Palsy, which affects a facial nerve.

The most common symptoms of neuropathy are constant or shooting pain, burning, numbness, and tingling.

Peripheral neuropathy means the symptoms are in your feet or hands, although neuropathy as a whole can affect any of the nerves in your body.

NERVES

How nerves work

SENSORY NERVES

These nerves work by converting heat, pressure, etc. into electrical signals in the extreme ends of the nerves, called dendrites. If they are starved for blood, they cannot do their job.

When these signals reach the body of the nerve cell, that cell determines if the signal should be ignored or sent up to the brain for evaluation. If the cell has been poisoned by toxins, it can be overly sensitive and send pain signals when there is no pain or ignore important pain signals resulting in numbness.

These signals are sent to the next nerve through its outgoing path, called the axon. If this part has been damaged by trauma or having its fatty myelin sheath that covers it etched away by statins, the signal cannot reach the synaptic junction

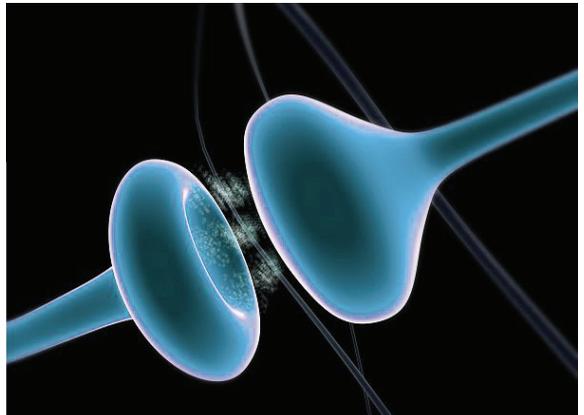

The nerves do not actually touch each other. They are separated by a fluid filled sack called the synaptic junction. Once the signal reaches the end of the nerve, it must jump across this fluid. Pure, distilled water is not conductive, so the body infuses this fluid with minerals it gets from nearby blood vessels to make the fluid conductive so the electrical signals can jump across this gap.

When these series of peripheral nerves reach the spine, they connect with the synaptic junctions of the central nerves (spine and brain) and continue up to the brain for evaluation.

MOTOR NERVES

The brain determines the proper actions to take to remedy any traumatic pain such as stepping on a nail by sending a signal down the motor nerves to the leg muscles to quickly lift the foot off the nail.

The brain also monitors the blood and lymph flow to provide the best environment conducive to keeping all the nerves healthy by opening or closing blood vessels, adjusting the heart rate, controlling the body's temperature and breathing, and reaction to stress.

CAUSES

LITTLE KNOWN CAUSES OF NEUROPATHY

- > Diabetes.
- > Chemicals such as, statins, chemo, Agent Orange, smoking, Lyrica, gabapentin, pregabalin, aluminium, and fluoride.
- > Physical impingements or inflammatory swelling in the limbs.
- > Surgical or traumatic injury.
- > Obstruction in the lymphatic circulation system.
- > Demineralization of the synaptic junctions between nerve cells.
- > Identification of dysfunctional nerve waveforms.
- > Disuse muscle atrophy of the calves.
- > Poor sleep patterns.
- > Poor management of excessive stress.
- > Autoimmune Disease.

DOES YOUR CURRENT NEUROPATHY TREATMENT COVER ALL OF THESE ELEMENTS SIMULTANEOUSLY?

IDEAL SOLUTIONS

- > Blood flow needs to be restored to the extremity of the skin with symptoms.
- > Blood flow needs to be restored in the veins from the extremity to the heart.
- > Lymphatic circulation needs to be restored.
- > Physical impingements need to be identified, reduced, or eliminated.
- > The nerve path needs to be restored.
- > Remineralization of the synaptic junctions needs to take place.
- > Calf muscles need to restore circulation of blood and lymph.
- > Re-education of the nerve cells to create and transmit healthy waveforms.
- > A strong enough electrical impulse to jump the gap in severed nerves.
- > A strong enough electrical impulse to jump the gap in demineralized synaptic junctions.
- > Sleep aid to provide proper endorphins to relax your patient.
- > Easy stress management.
- > Counselling with medical providers to reduce intake of toxins.
- > The entire area of the foot or hand must be treated.
- > The device should be safe and simple to operate.

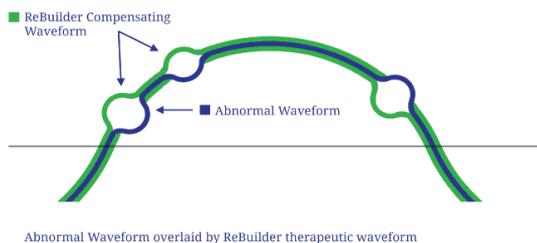

HOW DOES THE REBUILDER® UNIQUELY ELIMINATE NEUROPATHY SYMPTOMS?

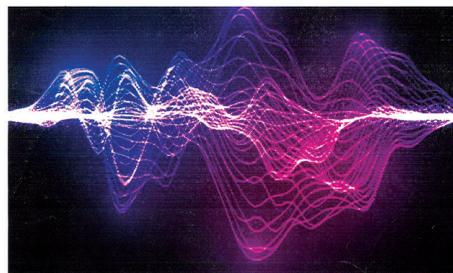

- ✓ By warming the feet via the warm water footbath, blood flow to the capillaries is enhanced via vasodilation.
- ✓ The water in the footbath becomes the electrode of the ReBuilder®, thus the entire surface of the extremity is treated, not just under common 2 by 2 electrodes.
- ✓ The warm water footbath with the ReBuilder® electrolyte provides the exact ratio of minerals that the synaptic junctions need.
- ✓ The ReBuilder® analyzes the endogenous nerve waveforms automatically.
- ✓ By creating a unique compensating waveform and delivering it to the nerves, the nerves are gently coaxed back to producing and transferring healthy waveforms.
- ✓ The ReBuilder®'s signals are stronger than normal nerve signals, and thus can jump the gaps in dysfunctional nerves. This signal also allows passage through inflamed, swollen tissues, and poorly mineralized synaptic junctions.
- ✓ The ReBuilder® provides a simultaneous muscle stimulation signal (EMS) to cause the calf muscles to contract and relax fully, thus restoring venous blood flow, lymphatic blood flow, strengthening the venous muscle pump, and eliminating disuse muscle atrophy.
- ✓ The ReBuilder® causes the brain to produce endorphins (as strong as prescription opioids, but without any side effects) to reduce pain globally, reduce stress levels, help the patient get to sleep faster and stay asleep all night.

- ✓ The ReBuilder® directs its therapeutic muscle stimulating signals from one foot, up that leg, across the synaptic junctions in the lower back, down the other leg, to the opposite foot, thus reestablishing the proper nerve paths, etc.
- ✓ In areas of physical nerve impingements, the ReBuilder® delivers its signals directly to that local area (such as the lower back, knee, shoulder, elbow, and hip) via its electrically conductive self-adhesive pads.
- ✓ The ReBuilder® measures the patient's body mass, electrical resistance, voltage, impedance etc. to self-set itself to the proper safe levels of stimulation automatically. Ordinary TENS devices send the same signal to each patient.
- ✓ The ReBuilder®'s intensity level is controlled by a simple old-style radio knob, so even arthritic hands can adjust the intensity. (The waveforms, etc., are automatically adjusted via the internal microprocessors.) No glass screen to break.
- ✓ The ReBuilder® uses a common 9-volt battery (available everywhere) to avoid the dangers inherent in the use of rechargeable lithium batteries. It is a simple matter to replace it with a fresh one and resume the treatments.

ReBuilder® Optimized Signal Balances Abnormal Waveform

The ReBuilder® is uniquely designed to correct improper nerve function instead of only temporarily masking the pain like a TENS device does.

The image above depicts how the ReBuilder®'s unique waveform works to heal the nerves in 3D.

(This image was taken with an oscilloscope.)

REBUILDER® VS. TENS COMPARISON CHART

ReBuilder®	TENS
ANALYZES PATIENT'S NERVE FUNCTION LIKE AN EKG	No
ANALYZES THE PATIENT'S BODY MASS, ELECTRICAL RESISTANCE AND AUTOMATICALLY SETS ITSELF FOR SAFETY	No
ANALYZES THE PATIENT'S ELECTRICAL VOLTAGE AND SETS ITSELF FOR SAFETY	No
SENDS AN INITIAL "NORMAL" WAVEFORM TO TRIGGER AN ENDOGENOUS NERVE SIGNAL	No
OVERLAYS AN EMS WAVEFORM TO STIMULATE THE VENOUS MUSCLE PUMP	No
OVERLAYS AN EMS SIGNAL TO STRENGTHEN CALF MUSCLES FOR BALANCE CONTROL	No
OVERLAYS AN EMS SIGNAL TO STRENGTHEN CALF MUSCLES TO PREVENT DISUSE MUSCLE ATROPHY	No
USES SLOW 7.83 HZ SIGNAL TO GIVE THE NERVES TIME TO REPOLARIZE FOR THE NEXT SIGNAL	No
TREATS NUMBNESS	No <i>(Can cause permanent numbness)</i>
TREATS TINGLING	No <i>(Can cause permanent tingling)</i>
STIMULATES ENDORPHINS FOR GLOBAL PAIN RELIEF	No
STIMULATES ENDORPHINS FOR ANXIETY RELIEF	No
STIMULATES ENDORPHINS FOR BETTER SLEEP PATTERNS	No
RELIEVES PAIN FOR 5-6 HOURS AFTER BEING TURNED OFF	No
SINGLE CONTROLS FOR ARTHRITIC HANDS	No
NO GLASS LCD TO BREAK	No
NO NEED TO LEARN ANY "SETTINGS"	No

ReBuilder®	TENS
ADAPTS TO EACH INDIVIDUAL PATIENT EVEN DURING THE ACTUAL TREATMENT.	No
SIMPLE, 9 VOLT BATTERY, AVAILABLE ANYWHERE	No
AVOIDS LITHIUM BATTERY AND CHARGER FOR FIRE AND EXPLOSION SAFETY	No
PRESCRIPTION STRENGTH	No <i>(Under powered to avoid prescription requirement)</i>
MADE IN THE USA	No <i>(Made in China)</i>
TREATS ENTIRE LOWER HALF OF THE BODY	No <i>(Treats only the limited area between the electrodes (6 inches))</i>
LIFETIME WARRANTY	No
INCREASES CIRCULATION IN CALF MUSCLES	No
INCREASES CIRCULATION IN THE FEET	No
PROVIDES MINERALS FOR THE SYNAPTIC JUNCTIONS IN NERVES	No
TREATS NERVES AND MUSCLES SIMULTANEOUSLY	No
FREE OF EXPOSURE TO RAT POISON DURING SHIPMENTS	No <i>(Shipping containers are sprayed with rat poison during transatlantic shipping)</i>
IN PRODUCTION SINCE 1987	No <i>(Most produced in last 3 years)</i>
FREE OF REPORTED FDA ADVERSE REACTIONS	No <i>(Hundreds of FDA reports of injury and death)</i>
COMPANY AVAILABLE VIA PHONE FOR INSTANT CUSTOMER SERVICE	NO

HOME TREATMENT

Treat yourself at home
with an easy & effective
neuropathy treatment.

“Neuropathy pain is reduced and it is amazing so far. Maybe this will be the answer to years of incapacitation.”

-G.S. | June 7, 2016

“I paid over \$8,000 last year to a doctor for injections, and it did not work nearly as well as my ReBuilder®. I love it.”

-T.A. | August 12, 2015

“Your product is excellent, requires no help as the quality is exceptional & speaks for itself. It provides quality of life for clients suffering in pain & seeking an answer.

It worked for my husband who has pain from diabetic neuropathy & suffers with poor circulation, leg ulcers & chronic pain. Doctors had given up on him, only providing narcotics & the possibility of amputation in future. The ReBuilder® worked for him, he's off narcotics & pain is 70% reduced, the color has returned to near normal & leg ulcers have healed. We promote & tell our story to others suffering & seeking help. His Dr's who were skeptical, discouraging him from using the product have since become believers & recommend it to others who have given up. He has his life back thanks to the ReBuilder®.

Thank you so much!!!!”

-Ann-Marie | March 20, 2009

THE REBUILDER® HAS VERSATILE TREATMENT OPTIONS

KNEE TREATMENT

The above image depicts our Knee Strap accessory that gives a direct treatment for a patient who is suffering from neuropathy in their knees.

Our Straps Come in Multiple sizes for different parts of the body. We have straps to treat the elbows, thighs, and even the back.

HAND TREATMENT

We have multiple treatment options for neuropathy in the hands. The Treatment to the left is one of our proprietary accessories called ReBuilder® FootPads

This accessory can be used for both the hands and feet, but is especially useful for treating carpal tunnel.

FOOT TREATMENT

For foot treatment we also have several ways for patients to treat their foot and leg pain. The image above depicts the adhesive pads placed on the bottom of each foot.

Alternatively we also offer a footbath treatment which uses nonadhesive pads placed in a two compartment footbath with warm water

SUCCESS IN THE MD COMMUNITY

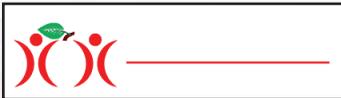

...with the ReBuilder®

THE REBUILDER® HAS BECOME THE PREFERRED STANDARD OF CARE IN HOSPITALS AND CLINICS AROUND THE WORLD!

There are 55,762 doctors & 317 hospitals and clinics using our device to give their patients a better quality of life and heal without the use of harmful medication.

Don't miss out, use the ReBuilder® yourself!

I have 4 disc herniations, scoliosis, and Neuropathy. I have been using ReBuilder® Medical products for over 6 years. I personally use the water treatment plus the ReBuilder® 2407 model for my own Neuropathy 2-3 times per week in my office. I take my machine anytime I travel and use the sticky pads. If I am able to sit or lie down, I put one pad on the bottom of each foot and it automatically turns off after 30 minutes. I am able to be active because of this equipment. It is definitely cost effective. I recommend this treatment in my office with all my Neuropathy patients with great results of less pain, decreased numbness, ability to stand or walk, no more waking up at night. I would recommend the ReBuilder® equipment to any doctor wanting to help more people with Neuropathy.

-Dr. Kim Martin

North Shore Health Solutions, Ltd.

The ReBuilder® System, a fabulous medical device to help alleviate the symptoms of Peripheral Neuropathy. In the past, we have used traditional physical therapy electrical stimulation devices, but the ReBuilder® System provided our patients with Chemotherapy Induced Peripheral Neuropathy (CIPN) the best and longest lasting pain relief while undergoing chemotherapy treatment. With these remarkable results (96% success rate) the ReBuilder® System is now being used across all CTCA sites – helping more oncology patients relieve their CIPN symptoms.

-Stanislav Maravilla, PT

*Director of Rehabilitation Services
Cancer Treatment Centers of America
@ Midwestern Regional Medical Center*

In June of 2013, Centra began offering ReBuilder®, a cutting-edge rehabilitation treatment designed to stimulate the nerves and muscles. For neuropathy patients, the treatment offers a new lease on life.

People want to get better and they want their lives back. The ReBuilder® program typically brings success within five to six treatments... eight of 10 patients have experienced positive results from the treatment. Nearly everyone sees some change. Patients are able to stop taking pain medications and live a much higher quality of life. Neuropathy seems hopeless, but the ReBuilder® program offers drastic changes to many patients and is really reshaping lives.

-Centra Hospital

Lynchburg, VA and its 8 outpatient clinics
